Re: Notice of Construction - Center Road Pipe Project

The cast iron pipeline in Center Road between Tamalpais Avenue and Ormond Court has been identified as needing replacement due to exterior deterioration. The pipeline was installed in the 1950s and has had a number of failures. This pipeline segment consists of approximately 1050 feet of 6-inch and 200 feet of 8-inch pipe. The project will abandon in place 1,250 lineal feet of cast iron pipe located in Center Road, and re-connect the existing side mains and services to an existing parallel 16-inch mortar lined steel pipe. Construction will also occur at the intersection of Center Road and the following side streets: Ormond Court, Storybrook Court, Zanco Way, Grove Lane and Crescent Lane.

The construction schedule is anticipated to start the first week of October and extend through the month. During this time, parking in the construction areas will be prohibited from 7:00 am to 6:00 pm. Construction personnel will be providing traffic control within the construction zone, and traffic delays should be anticipated. In an effort to assist with traffic mitigation, the District will commence minor construction activity at 8:30 am, and start major construction activity at 9:00 am. Construction will be completed by 6:00 pm each weekday. No work is schedule for the weekends.

For additional information, please contact North Marin Water District at (415)761-8935. Thank you for your patience during construction of this important project.
