

North Marin Water District

OPERATIONS AND MAINTENANCE PROGRAM ASSISTANT III

*This class description is only intended to present a summary of the range of duties and responsibilities associated with the positions. Descriptions **may not include all** duties performed by individuals within the class. In addition, descriptions outline the minimum qualifications necessary for entry into the class and do not necessarily convey the qualifications of incumbents within the position.*

DEFINITION

Performs a variety of technical tasks in the areas of Water, Waste Water and Recycled Water facilities asset and data management tracking and record keeping, manual and computer-aided drafting, specific program oversight, with a variety of administrative support and other technical related office and field activities.

DISTINGUISHING CHARACTERISTICS

The **Program Assistant III** performs technical administrative operations and maintenance program planning work. This is an upper mid-level position in the Operations and Maintenance Technician series and provides program oversight and support to District Staff primarily related to asset management, asset data collection, record drawings and asset management records training. This series is distinguished from the Engineering series in that the latter perform primarily civil engineering work related to design and construction of facilities.

SUPERVISION RECEIVED

Receives direct supervision from the Operations/Maintenance Superintendent, is increasingly more self-directed and works closely with other Department heads and supervisors.

ESSENTIAL DUTIES (include but are not limited to the following)

Has a lead role in the oversight of maintenance record keeping, with respect to Asset Management, Cross Connection, GHG emission tracking, Water Loss, Hazardous Materials Business Plans (HMBP) and other Operational programs. Assists the Operations and Maintenance Superintendent in long-term planning for the 5-year and 20-year improvement projects program. Take a lead role in small project management. Stays informed on new developments in the field of asset management systems and maintenance best practices. Develops recommendations regarding infrastructure management standards including establishment of program performance goals and measurement indicators. Performs data input and updates, performs queries and creates reports using a geographic information system, and other databases, spreadsheets, and word processing software. Performs calculations and analysis on such things as rainfall, water storage, and water use. Maintains and updates a variety of water supply and water distribution system records, charts and maps, develops reports and correspondence related to District water service and facilities. Gathers information pertaining to the field location of District facilities, makes field measurements and sketches to complete as-built drawings; deals courteously with and provides information to the general public. Collects and compiles data and statistics, researching information from a variety of sources as required, and other duties as assigned.

QUALIFICATIONS (The following minimum qualifications are necessary for entry into the class)

Education/Experience

Possession of a high school diploma or its equivalent with a minimum of five years' experience in a technical field or records management including organizing and maintaining accurate files and records, including computer data storage and retrieval. Experience with office software such as Word, Excel, PowerPoint and Outlook, maintenance management software, such as

NexGen, Swiftcomply and SCADA computer system, and supplemental courses in Access, Project and engineering/drafting desired.

Knowledge/Skill/Ability

Knowledge of: principles of math - algebra, geometry, and trigonometry desired; and drafting. AutoCAD experience a plus. Understanding of the principals of predictive and preventative maintenance programs. Familiar with California reporting standards for water loss, GHG tracking, CCC activities. Operate a personal computer in a networked environment to input and retrieve data, compile and enter statistical and other data accurately into appropriate forms, reports, and documents. Understand and carry out written and oral instructions. Deal effectively with those contacted in the course of work. Analyze situations accurately and adopt an effective course of action.

Skill to: Manage small maintenance and operations projects—Maintain a data driven asset management tracking system through the use of multiple source databases, manufacturer recommendations and field investigations. Perform data entry, routine manual and drafting and other office and field work as needed. Work with a verity of other District staff and aid in their development and understanding of operations programs.

Ability to: Perform a variety of technical office and field assignments; read and interpret plans, maps, construction drawings, diagrams, specifications and technical materials. Rapidly learn the policies and procedures of the work; research information from a variety of sources; keep accurate records; prepare clear and concise reports in an established format; work safely, work cooperatively with others and work overtime if required. Ability to use correct English including punctuation, grammar, spelling and business letter writing and to follow basic safety practices and procedures.

License/Certificate

Possession of a valid Class C California driver's license.

WORKING CONDITIONS/PHYSICAL REQUIREMENTS

Position requires prolonged sitting, standing, walking, reaching, twisting, turning, kneeling, bending, squatting, and stooping in the performance of daily activities. The position also requires grasping, repetitive hand movement, and fine coordination in preparing and reviewing construction plans, statistical reports and data, and using a computer keyboard. Additionally, the position requires near, far, and color vision in reading reports, reviewing plans and blueprints, and using the computer. When visiting construction sites or existing District facilities the position will require walking on uneven and slippery surfaces, climbing ladders or stairwells, exposure to all weather conditions, dust and pollen, and potential mechanical and heavy equipment hazards.

OTHER REQUIREMENTS

Per California Government Code, Title 1, Division 4, Chapter 8, Section 3100, "all public employees are hereby declared to be disaster service workers subject to such disaster service activities as may be assigned to them by their superiors or by law."
